***** *** INTESTINAL BARRIER FUNCTION TEST *** *****

PARAMETER	RESULT	REFERENCE RANGE	UNIT
AEROBIC BACTERIA (IgA + IgM)	121.2		EU
	LOW:	< 41	EU
	EQUIVOCAL:	41 - 45	EU
	ELEVATED:	> 45	EU
ANAEROBIC BACTERIA (IgA + IgM)	113.2		EU
	LOW:	< 31	EU
	EQUIVOCAL:	31 - 34	EU
	ELEVATED:	> 34	EU
DIETARY PROTEIN (IgA + IgM)	100.7		EU
	LOW:	< 29	EU
	EQUIVOCAL:	29 - 32	EU
	ELEVATED:	> 32	EU
YEAST (IgA + IgM)	115.7		EU
	LOW:	< 40	EU
	EQUIVOCAL:	40 - 44	EU
	ELEVATED:	> 44	EU
SECRETORY IgA	109.5	10.0 - 60.0	EU

***** *** INTERPRETATIVE DATA *** *****

High IgA + IgM titers against aerobic bacteria may be an indication of aerobic bacteria overgrowth and intestinal imbalance.

High IgA + IgM titers against anaerobic bacteria may be an indication of anaerobic bacteria overgrowth due to intestinal imbalance.

High IgA + IgM titers against dietary proteins and all the above micro-organisms is an indication of enhanced gut mucosa permeability.

High IgA + IgM titers against Candida may be an indication of Candida overgrowth due to intestinal imbalance.
