

Specialized Kinesiology

Presentation & Demonstration

Please come and watch a presentation and demonstration on how **Specialized Kinesiology** can help you.

Specialized Kinesiology uses "muscle testing" as a tool to determine imbalances in the body and helps to determine if the root causes are from nutritional deficiencies, mental or emotional stress, physical trauma from previous injuries or toxic overload due to poor detoxification. Once the imbalance is determined, steps can be taken to get the body to heal itself through supporting the body with nutrition, emotional healing or by various healing techniques such as stimulating or massaging acupuncture points.

Presenters: Trish Leclair & Karen Hyland

Date: July 17, 2010
